

AI Leadership: AI Strategy and Opportunity

The AI Strategy and Opportunity Apprenticeship Unit is designed for leaders and managers responsible for setting the direction for artificial intelligence within their organisation.

Learners will develop the knowledge and skills needed to understand the capabilities and limitations of AI, identify opportunities for innovation and productivity, and make informed decisions about where AI can add value.

The unit focuses on evaluating risks and opportunities, developing business cases, and creating an AI strategy that aligns with organisational goals, values, and long-term objectives. As organisations increasingly explore the potential of AI, this unit helps leaders build the confidence and capability to make strategic decisions about AI adoption and future investment.

How long does the Apprenticeship take?

A minimum of 30 guided learning hours.

What qualifications will the learner receive?

Level 5 Apprenticeship Unit certification for the relevant AI Leadership unit.

What are the entry requirements?

Typically, candidates will be aged 19 or over, be employed, have employer support to undertake the programme, be working in, or progressing towards, a leadership or management role relevant to the unit.

Why choose Acorn Training?

We put our learners at the heart of everything we do. All our apprentices receive tailored one to one support from both a dedicated learning tutor and a learning mentor to ensure they are well-supported throughout their apprenticeship journey with us. We are an award-winning training provider renowned for our diversity and inclusion values and have recently been awarded a 'Good' rating in our first full Ofsted Inspection.
