

Level 4: AI and Automation Practitioner Apprenticeship

AI and Automation Practitioners help organisations improve productivity, streamline processes and drive continuous improvement through the safe and responsible use of artificial intelligence, automation and digital technologies.

The role focuses on identifying opportunities to improve efficiency by reducing manual tasks, eliminating duplicated processes and integrating digital systems. Learners develop the skills needed to analyse business processes, select appropriate AI and automation tools and implement practical solutions that deliver measurable business benefits.

As organisations continue to adopt digital technologies, AI and Automation Practitioners are becoming increasingly important in helping businesses improve efficiency, reduce costs and unlock new opportunities for growth and innovation.

How long does the Apprenticeship take?

18 Months.

What qualifications will the learner receive?

Level 4 AI and Automation Practitioner.

What are the entry requirements?

Typically, candidates will have achieved five GCSEs and/or A Levels; a Level 3 Apprenticeship; or other relevant qualifications and experience.

Why choose Acorn Training?

We put our learners at the heart of everything we do. All our apprentices receive tailored one to one support from both a dedicated learning tutor and a learning mentor to ensure they are well-supported throughout their apprenticeship journey with us. We are an award-winning training provider renowned for our diversity and inclusion values and have recently been awarded a 'Good' rating in our first full Ofsted Inspection.
