

Level 3: **Cyber Security Technician Apprenticeship**

Cyber Security Technicians support the security of an organisation's IT infrastructure, devices, systems, and data. They help protect organisations against cyber security threats by monitoring systems, implementing security controls, maintaining records, and supporting responses to security incidents.

The role involves carrying out cyber security activities in line with defined procedures and standards, identifying vulnerabilities, contributing to risk assessments, and promoting a positive security culture across the organisation. In today's increasingly digital world, cyber security technicians play a vital role in helping organisations safeguard their information and services from evolving cyber threats.

How long does the Apprenticeship take?

18 Months.

What qualifications will the learner receive?

Level 3 Cyber Security Technician.

What are the entry requirements?

Typically, candidates will have achieved five GCSEs and/or A Levels; other relevant qualifications and experience may also be considered.

Why choose Acorn Training?

We put our learners at the heart of everything we do. All our apprentices receive tailored one to one support from both a dedicated learning tutor and a learning mentor to ensure they are well-supported throughout their apprenticeship journey with us. We are an award-winning training provider renowned for our diversity and inclusion values and have recently been awarded a 'Good' rating in our first full Ofsted Inspection.
